Last modified: May 06, 2020

Your privacy and information security are important to us. We are committed to maintain and protect the security of our servers and your personal information. Once we receive your personal information, we will undertake all commercially reasonable efforts to ensure its security on our systems. We use industry standard encryption methods to protect personal data. We have established appropriate physical, electronic and management safeguards to secure the information we collect online, to prevent unauthorized access, to maintain data accuracy and to ensure only appropriate use of information. We never sell your data.

1. What information we collect and why

1.1. Public information

All your public information can be viewed on your public profile, including nickname, unique URL, profile image, website, social profiles, number of followers, as well as all the catalogs that you have created and published publicly. None of these details are mandatory for setting up an account, but we recommend displaying them on your profile, if you have any interest in branding or promoting your content.

You are responsible for the information that you share on your profile and the content of your catalogs, so you should think carefully about what you want to publish publicly. For sensitive information that you wish to keep private or share with a limited group of individuals, we recommend publishing your content [privately](#) on Flipsnack.

If you update your public information on Flipsnack it will automatically be updated on our website.

In addition to displaying your public information and your catalogs on Flipsnack, we also provide technology such as APIs and embeds to give you the option to make your catalogs available on other sites or platforms. Such embed codes and API integrations are not available to other publishers or site visitors of Flipsnack.

1.2. CONTACT INFORMATION AND PASSWORD

We use your email address and password to authenticate your account and keep it secure, preventing fraud, abuses and spam. We need your email to set up unique user accounts, to be able to get in touch with you and to send you personalized messages. You can always modify your email address directly from your account and you can reset your password at any time. Your password is non-reversibly encrypted before being saved to the database, for your protection, so it cannot be copied or stolen, even in case of a hacking attack.

We also use your email address to get in touch with you and to send you information about our services and to market to you according to your country's laws. You can check your account settings if you wish to control the type of emails you receive from Flipsnack or to unsubscribe from all email messages.

You can sign up for Flipsnack using another service: a Facebook or Google account. If you do, we will use information from that service to create your account, such as your email address and name. We do not collect any passwords at all for users that are using the Facebook Connect API as well as for those connecting with Google API.

If you email or contact us via live chat we will keep your contact info and message, to be able to send you a reply.

If you fill in a contact form or request to download a resource, you may be asked to provide personal data such as, but not limited to, your full name, your email address and your consent to receive marketing communications and materials. We collect and process this kind of personal data for the purpose of providing the desired service or resource, to study your interests for marketing purposes or for improving our website and platform.

If you leave comments or replies to comments on our [blog](#), you are required to provide your name, your email address and, optionally, your website URL. We require this personal data in order to ensure that you are a real person and to avoid spam.

1.3. Payment information

You may provide payment information on our site, when purchasing a premium subscription. We do not store payment information, such as debit/credit card number, CVV code or PayPal address on our database or servers. This information is processed and stored on the servers of our reliable and secure payment processors (Stripe and Braintree) in order to enable recurring payments to us. We will store your billing address, should you require an invoice. We also store the card's expiration date, so that we can send you a notification when your card is about to expire. This way you'll be able to experience uninterrupted premium services and keep your subscription active. If you wish to deactivate recurring payments, or update your billing information, you can do so in [Account Options](#). Your request to deactivate recurring payments will be automatically processed by our payment processors and your recurring payments will stop.

1.4. Additional information we receive about you

In addition to the data that you provide to us directly by either typing it in on our site or uploading it, we also use technology to track various aspects of site usage. All the data that we collect or track is needed to operate our services. We do not sell your information and we do not share your private information with anyone, except with trusted 3rd party service providers (listed in this privacy policy under 3rd Party Service Providers), but only if it's necessary for operating our services or because it's required by law.

We generally analyze sets of data to make sure our services are fully functional, to ensure a reliable and secure performance. Embeds. If you view catalogs integrated on 3rd party websites via embed codes or white labeled URLs, we may receive log data regarding your activity (what page you visited, session information and how you interacted with the embedded flipbook). This type of data does not contain any personally identifiable information and is reported as an aggregate to us. We make this data available directly in the publisher's account under statistics and in Google Analytics (for premium users who are using the Analytics integration). This type of information is important for our users who need to understand how their publications are performing in order to be able to optimize them or refine their marketing strategies.

Employees access to user data is controlled and limited.

Analytics – In order to understand the use of our service we need to allow site analytics tools to access some information regarding your site usage. These tools are Google Analytics and Hotjar. The information we collect through these third-party services includes your IP address, your device type and Operating System, your Internet browser, your location, the pages on our website you have visited, the actions you've performed on these pages (including recordings of your interactions, such as movements, mouse clicks), and actions you've performed in our online app (such as number of flipbooks you have created, upload and download history).

Advertising – We engage advertising tools and platforms (Google Ads, Bing Ads, Facebook Ads, Capterra, and G2Crowd) to run interest-based ads for Flipsnack or to display relevant advertising to you while using Flipsnack Service. In order to run ads, we need to allow advertisers to get information about site visits and visitors, through the use of cookies and other tracking methods, including Google Tag Manager. In order to measure the effectiveness of ad campaigns we allow Supermetrics to access data regarding the performance of our ad campaigns. To opt out of Google's use of cookies, please visit the [Google Advertising opt-out page](#). To opt out of targeted Facebook advertising, please visit [this page](#). Please note however

this does not opt you out of being delivered advertising. You will continue to receive generic ads.

CRM and email providers – Our business email addresses are managed by Google, so every email that you send to any employee will be accessed through Google Mail. We send out automated transactional emails (emails regarding account registration and payments) through Mailgun, which has access to email addresses of end users. Another CRM we use for the sales process is Hubspot. When you fill in the trial request form or meeting request with our sales agents, we will collect and store the information you provide in Hubspot CRM. Furthermore, we may also sync some user data from Intercom with Hubspot, for qualified sales leads. For CRM and for promotional emails we use Intercom. In order to perform its marketing automation functions and customer relationship management tool, Intercom has to have access to various metrics and information regarding our users, including actions performed on our site. Intercom collects publicly available contact and social information related to you, such as your email address, company, job title, social network handles and physical location, to optimize your user experience. For more information, please visit [this page](#). If you would like to opt out of having this information collected by or submitted to Intercom, please contact us.

Payment processors and reports - We share your payment info with payment service providers (Stripe and Braintree) to process payments, to prevent, detect and investigate frauds and for dispute resolutions (chargebacks, claims, refunds). We also use a 3rd party payment analytics tool (ChartMogul) to keep track of our business growth. ChartMogul has access to orders from Stripe, but it does not have access to credit card details.

Server storage and management - We use Amazon Web Services (AWS) for cloud services, database backup and storage. All the data that Flipsnack collects directly through its service and all the content uploaded or created by users on Flipsnack are hosted on AWS.
